

Amendment to the Specification

On page 3, line insert the following:

BRIEF DESCRIPTION OF DRAWING

Figure 1 is a graph, which shows 20° Gloss versus hours in the QUV weathering device at various times of exposure.

Amend the paragraph, which starts on page 16, lines 16-20 and ends on page 17, lines 1-3 in the following manner:

~~The following Graph 1 shows 20° Gloss versus hours in the QUV weathering device at various times of exposure.~~ The circles on the graph of Figure 1 represent Composition 1, the squares Composition 2, the diamonds, Composition 3, the triangles, Composition 4 and the solid circles Composition 5. Compositions 2, 3 and 5 represent the invention where either a disubstituted phenolic antioxidant or phosphite type hydroperoxide decomposer was included.

Delete the entire Graph 1 on page 17.

Amend the paragraph on page 17, lines 5-12 in the following manner:

In summary, the ~~above~~ graph of Figure 1 shows unacceptable QUV weathering for Composition 1 that did not contain a disubstituted phenol antioxidant and Composition 4 that did not contain a disubstituted phenol antioxidant, or a UV absorber or a hindered amine light stabilizer. Compositions 2, 3 and 5 that represent the invention that contained the antioxidant, UV light absorber and hindered amine light stabilizer in combination with the aspartic acid derivative had significantly improved weathering properties in comparison to Compositions 1 and 4.
